HANSHAL RAVINDRA BARI

Gandhinagar, Gujarat, India | hanshalbari15096@gmail.com | +91-9529933664 | github.com/Hanshalbari15096 | LinkedIn

EDUCATION

Indian Institute of Information Technology Vadodara (IIIT Vadodara) — **2025 – 2029**
Bachelor of Technology (B.Tech) in Artificial Intelligence — Gandhinagar Campus, Gujarat — Undergraduate

Rahul International College — *Boisar, Maharashtra* — **Completed 2025**
Higher Secondary Certificate (HSC, Class XII) — Science Stream — **Score: 84.67%**

Secondary School Certificate (SSC, Class X) — **Completed 2023**
General Science & Mathematics — **Score: 95.00%**

TECHNICAL SKILLS

Languages:	Python (Primary, Object-Oriented, Scripting), HTML5, CSS3, JavaScript (Basics)
AI & LLM Architecture:	Retrieval-Augmented Generation (RAG), Prompt Engineering, Multi-LLM Routing (Gemini, Groq, OpenAI), Voice Pipelines (Sarvam AI, Whisper, Google Speech), Vector Embeddings
Backend & Storage:	Flask, REST APIs, ChromaDB, Semantic Search, Chunking & Retrieval Pipelines, Caching & Connection Pooling
Developer Tools & Cloud:	Git, GitHub, Amazon Bedrock, AWS SDK (boto3), LocalStack, Jina Reader API, Firecrawl, BeautifulSoup, Dotenv

FEATURED PROJECTS

IP-SAKTI Sahayak — Multilingual RAG Assistant for Ayurveda IPR — Solo Project

Tech Stack: Python, Flask, ChromaDB, Gemini/Groq LLMs, Sarvam AI Voice Suite

- Engineered an end-to-end source-cited RAG assistant addressing the Ministry of Ayush hackathon problem statement covering Ayurveda patents, GI tags, ABS compliance, and regulatory frameworks.
- Constructed an overlapping chunking pipeline with jurisdiction metadata in a persistent **ChromaDB** vector store, incorporating strict relevance-scored retrieval to suppress hallucinations.
- Implemented a dual-jurisdiction routing engine (India vs. International), an ABS compliance checklist, and a 4-tier Ayurvedic formulation classifier (Classical, Proprietary, Polyherbal, Phytopharmaceutical).
- Integrated a voice pipeline supporting **9 Indian languages** with automated STT fallback (Sarvam AI → Groq Whisper → Google Speech) and TTS audio responses.
- Built production resilience: runtime LLM switching, zero-key demo mode, LRU query caching, and a 27-case automated verification test suite.

IndicGov — Vernacular Civic Document Simplifier — AWS Hackathon

Tech Stack: Python, AWS Bedrock (Claude 3.5 Sonnet Vision), Streamlit, boto3

- Built a multimodal document intelligence tool that transforms complex, bureaucratic government circulars and scheme notices into plain vernacular summaries and actionable checklists.
- Employed Amazon Bedrock Converse API with Claude 3.5 Sonnet to perform OCR, multimodal comprehension, eligibility classification, and localized translation in strict JSON format.

Open-Source Python & Developer Tooling — github.com/Hanshalbari15096

Tech Stack: Python CLI, REST APIs, Jina Reader, Firecrawl, yt-dlp, FFmpeg

- **LLM Content Scraper:** Built utilities stripping web clutter from URLs and generating clean Markdown tailored for LLM context windows using Jina Reader and Firecrawl APIs.
- **Security & Automation CLI Suite:** Developed open-source CLI tools including a local credential manager, an OpenWeatherMap API client, and an automated media processor with yt-dlp.

HACKATHONS & ACTIVITIES

- **Bharat Builds Tour / First Commit (2026):** Active builder developing serverless AI workflows leveraging AWS cloud services and open-source developer toolkits.
- **Active Open-Source Contributor:** Regular publisher of practical developer utilities and AI project repositories on GitHub.
